Almost $5 million raised in $7.5 million goal

The Cancer Survivors Park slat-ed for construction in downtown Greenville is moving closer to its fundraising goal. Initial construc-tion on a boardwalk running from Church Street into the new park is set to begin in early May, said Kay Roper, executive director of Can-cer Survivors Park Alliance.

The campaign targeting corpo-rate and other partners has raised $4.7 million of the $7.5 million goal to date, and a public capital campaign is set to launch in June to coincide with National Cancer Survivors Day, Roper said.

At a recent Greenville Coun-ty Council committee meeting, Roper and Dr. Larry Gluck of the Greenville Health System’s Cancer Center encouraged council mem-bers to match the city of Green-ville’s contribution of $1.2 million. Gluck said the space will attract re-gional visitors, but “right now the space repels,” he told council.

The nearly seven-acre park between Cleveland and Church streets behind the Greenville Chamber of Commerce will feature multiple gardens, a 2,000-square-foot building, edu-ca-tion pavilion, bridge over the Reedy River and sculptures.
Cancer Survivors Park details
